GFSA-SB · MISSION DARKNESS™

Shielded Box

Hard-sided, signal-blocking storage for 36 phones. Phones go in, the lid closes, and every signal stops.

36 numbered slots | Lockable lid

Everyday use

1. **Assign each student a numbered slot.**
2. **Load the phones, one per compartment, fully inside.**
3. **Close the lid firmly along its full length.**
4. **Padlock the lid latch.**
5. **Unlock at the end of class.**

Care & maintenance

Clean
Soft, dry cloth only. No moisture or solvents.

Store it open
Leave the lid open when not in use. Gaskets last far longer.

Test the seal
Each term, close a phone inside and call it. No ring means it works.

REPLACING THE GASKETS

Gaskets last a long time. Replace only if signal gets through. A spare set is included.

1. Work one gasket at a time so sizing and orientation always match.
2. Peel one old gasket out of its channel in the lid or base.
3. Peel the backing off the matching new gasket and press it into that same channel.
4. Repeat for each gasket, then close the lid and run the phone-call check.

GENERATION FARADAY APP

Track it digitally

Register each box, assign slots, and see compliance at a glance. iOS, Android, or **app.generationfaraday.com**.

SCAN TO DOWNLOAD

1 Download the app and create your account

App Store, Google Play, or on desktop at **app.generationfaraday.com**. Sign up with your school email, then invite your staff.

2 Register the box to a class or room

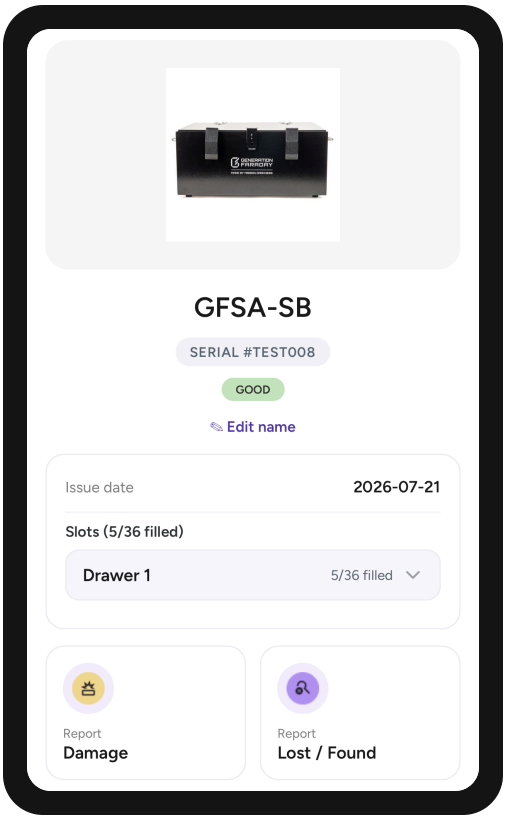

Scan the RFID tag against the “scan here” mark, or search the serial number. Name the unit for where it lives: *Box 4 · Room 118*.

3 Assign students to numbered slots

Upload your roster and assign up to 36 students. The slot map matches the foam insert, so their number in the app is their number in the box.

4 Track attendance & compliance

Mark slots as phones come in, then report student violations or condition updates for any damage that occurs.

ONBOARDING & SUPPORT

We'll help you roll out

Questions on deployment, quantities, or lead times? Your Generation Faraday contact is ready to help.
