GENERATION FARADAY APP

Seamlessly Monitor and Manage Student Faraday Bag Usage

The Generation Faraday App is more than a monitoring tool—it's a complete solution for promoting compliance, improving classroom focus, and giving educators and administrators the confidence to maintain a signal-free environment effectively.

- It tracks individual bag assignments, serial numbers, and replacements while identifying students who fail to comply with cell phone policies.
- Our team handles the data entry, populating the app with all the necessary information to ensure your assets are organized and easy to manage from day one.
- Administrators can access school-wide usage statistics, monitor asset allocations by unit and dollar value, and quickly pinpoint compliance issues.
- Stay informed with a live summary of student signal activity. The dashboard offers an intuitive interface to monitor individual compliance in real time, allowing administrators to verify bag usage effortlessly.

KEY BENEFITS

Simplify Policy Enforcement

Eliminate the guesswork in enforcing signal-free policies by using automated signal detection and real-time reporting.

Actionable Insights for Administrators

Empower school administrators with clear data to address non-compliance promptly.

Enhanced Focus in Classrooms

Support a distraction-free learning environment, ensuring students stay focused during instructional time.
