

GENERATION FARADAY™

SIGNAL BLOCKING BAGS DESIGNED TO ELIMINATE CLASSROOM DISTRACTION

Your School's Best Choice for Cell Phone Management

Generation Faraday™ bags block phone signals, ensuring students stay focused and freeing teachers from the burden of policing phone silencing in the classroom. Our locking version adds an extra layer of control, preventing unauthorized use during class. Each classroom is equipped with two unlocking devices—provided at no cost—for rapid phone access in emergencies. The bags are also highly water-resistant, making them durable enough to last 2-3 times longer than competitor products, maximizing the value of your bulk purchase.

Crafted by Mission Darkness™, the global leader in signal-blocking solutions, Generation Faraday™ combines superior quality with unbeatable pricing, keeping costs significantly lower than the competition.

Generation Faraday vs. Other Options (Cell Phone Hotels, Older Locking Bags, Etc.)

- ▶ **All Signals are Blocked:** Teachers can teach, not police device silencing. Gain back 10 minutes per class!
- ▶ **Students Maintain Possession:** No questions of device theft or damage, eliminating liability issues.
- ▶ **Immediate Emergency Access:** 2 unlocking devices provided per classroom for immediate access
- ▶ **Highest Quality / Lowest Price:** Waterproof construction lasting 4+ years conserves school budget while pricing remains significantly lower than competitors
- ▶ **School to Home:** Bags go from school to home, helping parents encourage tech-free time at dinner or after. This creates a positive cycle that reinforces focus and good habits back at school.

GENERATION FARADAY™ BAG DETAILS

SIGNAL BLOCKING CELL PHONE BAGS - WITH OR WITHOUT LOCKING CAPABILITY

BLOCKS ALL CELL PHONE SIGNALS

No more ringing or dinging during class—without needing to power off devices. This eliminates the need for teachers to enforce phone silencing, giving them more time to focus on teaching and providing students with uninterrupted instruction.

CONSERVES SCHOOL BUDGET

Unlike other companies that rely on repeat purchases, we prioritize durability and longevity. Our waterproof, highly durable bags are designed to last 2-3 times longer, saving you money and reducing the need for frequent replacements.

IMMEDIATE EMERGENCY ACCESS

Parents want their children to have immediate access to emergency devices. That's why we provide two unlocking stations per classroom, ensuring our locking bags can be opened quickly in critical situations, potentially saving lives.

SCHOOL TO HOME

Parents now have an effective tool to curb phone usage during dinner and beyond, creating a significant benefit for families and fostering a positive cycle of healthy habits between school and home.

ROCK BOTTOM PRICING

Generation Faraday is crafted by Mission Darkness, the global leader in signal-blocking bags. Our unbeatable pricing is made possible through high-volume production and trusted partnerships built over a decade. Plus, when it's time to reorder, you'll enjoy the same discount tier as your original purchase.

LIMITED TIME F.I.R.M. PRICING OFFER
\$10 - \$18.20/BAG PRICE RANGE

STAYS LOCKED DURING CLASS

Our locking bag remains secured throughout class, with two Unlock Docks or handheld keys per classroom provided at no extra cost. This prevents traffic jams after class and ensures quick access during emergencies, addressing the shortcomings of having only one terminal.

Generation Faraday Max-Lock Phone Bag

- **NO CONTRACTS** You own everything outright.
- **TOP SERVICE & SUPPORT** We are based in Santa Barbara, Ca and provide 1 day free training with every bulk order.

IMPLEMENTING A PHONE-FREE SCHOOL POLICY WITH GENERATION FARADAY™ BAGS

1

Educate the School Community: Start by informing administration, parents, and students about the benefits of a phone-free school policy. Share research on how reducing phone use boosts focus, improves mental well-being, and minimizes distractions. We gave your school a copy of *The Anxious Generation* by Jonathan Haidt. It's a great place to start, and Generation Faraday can help too!

2

Set Clear Expectations: Establish a consistent, school-wide policy detailing where and when phones can be used. Make sure everyone—teachers, students, and parents—understands these guidelines and how they'll be enforced.

3

Introduce Faraday Bags as a Practical Solution for Device Management: Introduce Generation Faraday bags as a way to block signals so teachers don't have to police phone silencing, and explain that emergency access for locking bags is quicker with 2 unlockers per class. Additionally, let parents know that they now have a tool to use at home to reduce cell phone usage at dinner or after.

4

Train and Support Teachers: Provide teachers with the tools and guidance they need to enforce the policy. Offer tips for creating cooperation around the new policy and give teachers access to ongoing support. Generation Faraday has recommended policies and offers 1 day free training for every bulk order as well.

5

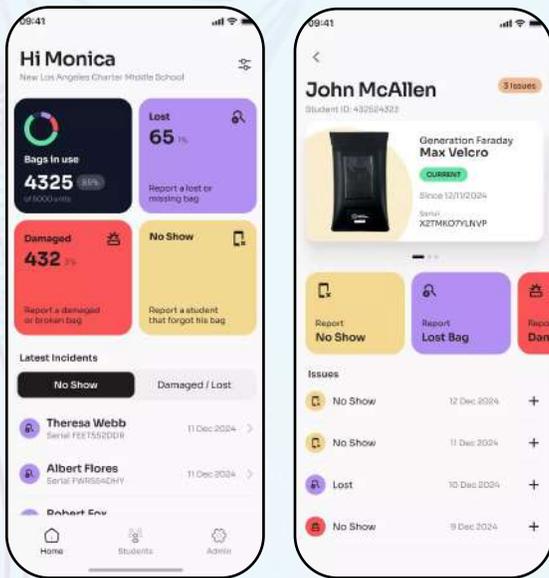

Anticipate Parental Concerns – And Have a Plan: Create a system that allows parents to reach their children during the school day for important updates, schedule changes, or family emergencies.

We offer ongoing support to ensure a smooth implementation of Faraday bags and policies, helping schools create a focused, distraction-free learning environment.

GENERATION FARADAY APP

Seamlessly Monitor and Manage Student Faraday Bag Usage

The Generation Faraday App is more than a monitoring tool—it's a complete solution for promoting compliance, improving classroom focus, and giving educators and administrators the confidence to maintain a signal-free environment effectively.

- It tracks individual bag assignments, serial numbers, and replacements while identifying students who fail to comply with cell phone policies.
- Our team handles the data entry, populating the app with all the necessary information to ensure your assets are organized and easy to manage from day one.
- Administrators can access school-wide usage statistics, monitor asset allocations by unit and dollar value, and quickly pinpoint compliance issues.
- Stay informed with a live summary of student signal activity. The dashboard offers an intuitive interface to monitor individual compliance in real time, allowing administrators to verify bag usage effortlessly.

KEY BENEFITS

Simplify Policy Enforcement

Eliminate the guesswork in enforcing signal-free policies by using automated signal detection and real-time reporting.

Actionable Insights for Administrators

Empower school administrators with clear data to address non-compliance promptly.

Enhanced Focus in Classrooms

Support a distraction-free learning environment, ensuring students stay focused during instructional time.

OUR MISSION

Generation Faraday™ creates premium signal-blocking tools designed to promote focus and enhance learning in the classroom. Our mission is to support educational growth and mental well-being for students, teachers, administrators, and families, fostering a positive impact that extends beyond the classroom.

Legislation to Manage Cell Phones in Schools:

More and more states are adopting policies to limit smartphone use in schools, recognizing the need for focused and distraction-free learning environments. For example:

- California's Phone-Free Schools Act (AB 3216)
- Maine's State Bill LD 1170
- Utah's HB 270
- New York City Department of Education Policy

This growing movement is backed by research showing that unrestricted smartphone access during school hours negatively impacts academic performance, increases incidents of cyberbullying, and contributes to mental health challenges such as anxiety and depression.

TO HELP SCHOOLS COMPLY WITH NEW LEGISLATION, OUR DONOR-BACKED F.I.R.M. PROGRAM OFFERS, FOR A LIMITED TIME:

- ❑ ***Lifetime Pricing at Reduced Rates***
- ❑ ***Customization Options***
- ❑ ***Fast Delivery***
- ❑ ***Dedicated Product Support to Ensure a Smooth Implementation for Your School***
